vim  
sublime

## Experience

### ReachLocal, Irvine, CA

#### Software Engineer, October 2013 – Present

Collaborated with several teams using agile practices to develop, build and maintain several applications.

- Maintained a Ruby on Rails SaaS application using agile practices including BDD/TDD and peer review to ensure high-levels of test coverage and maintainability.
- Developed internal centralized blog and discussion system using Middleman and Discourse to facilitate collaboration across teams.
- Contributed to internal and external open source projects including 'Pra' and 'Discourse'

### Bluedefense.com

#### Lead Developer, January 2009 – Present

Developed and configured a custom user interface utilizing PHP, CSS, & JavaScript.

- Managed, strategized, and scoped all marketing activities including (but not limited to) search engine optimization (SEO) and guerrilla marketing leading to an increase in traffic and profit.

### Auction.com, Irvine, CA

#### Business Analyst, October 2010 – January 2011

Led a two-month contract automation project resulting in a 200% increase in efficiency processing escrows.

- Managed researching web design firms for the most comprehensive usability and scalability redesign effort to date.
- Discovered an online vulnerability where sensitive information was being revealed.
- Facilitated and lead requirement gathering sessions across several departments.
- Communicated and monitored critical changes in deadlines & milestones between projects.

### The DIRECTV Group, Los Angeles, CA

#### Business Analyst, June 2007 – January 2009

Managed production outages by engaging appropriate teams, identifying root cause, and communicating resolutions to business and IT units.

- Developed complex SQL queries to pull information from SQL SERVER 2005 and ORACLE 9i database in order to track progress and trend growth.
- Provided production support for several business-critical billing systems.

## Education

### University of California, Los Angeles

Bachelor of Arts, Philosophy, 2006
